

REMARKS

FIGURES 2 and 3 have been corrected, the specification has been amended, claims 1-6 have been cancelled, and new claims 7-46 have been added.

Applicant respectfully requests examination and consideration of claims 7-46, now pending in the application.

Applicant has, for the Examiner's review and approval, corrected **FIGURE 2** in red to include reference numerals "**1**", "**4**" and "**8**" and their associated lead lines so that **FIGURE 2** conforms to its discussion in the specification.

Applicant has, for the Examiner's review and approval, corrected **FIGURE 3** in red to include reference numeral "**1**" and its associated lead line so that **FIGURE 3** conforms to its discussion in the specification.

Applicant has amended the specification by replacing the paragraph beginning on line 11 of page 5 with a replacement paragraph so that the description of **FIGURE 3** in the **BRIEF DESCRIPTION OF THE DRAWINGS** conforms to **FIGURE 3**.

Applicant has cancelled claims 1-6 without prejudice or disclaimer and has added new claims 7-46 to better define the present invention. Explanation of support for newly added claims 7-46 can be found in the original claims and/or the specification and/or the drawings, as at least tabulated in the **TABLE OF SUPPORT** attached hereto as **EXHIBIT A**.

Regarding finding support in the drawings, an amendment can find support in the drawings. *Corometrics Medical Systems, Inc. v. Berkeley Bio-Engineering, Inc.*, 193 USPQ 467 (D.C. N.D. California 1977) ("Material that is clearly disclosed by original drawings...is not new matter."[at 468][Emphasis added] and "[M]aterial added [that] is clearly disclosed by the original drawings...is not new matter."[at 473][Emphasis added] and "An amendment does not constitute new matter where the amendment...includes matter clearly disclosed by drawings in the original application."[at 476][Emphasis added]).

Therefore, newly added claims 7-46 do not constitute new matter.

Respectfully,

8-9-04
